

4D Global Infrastructure Fund

ARSN: 610 092 503 mFund: 4DI01

Monthly performance update

As at 31 August 2020

Overview

4D Infrastructure (4D) is a boutique asset manager investing in listed infrastructure companies across all four corners of the globe. Our investment objective is to identify quality infrastructure companies, trading at or below fair value with sustainable, growing earnings combined with sustainable, growing dividends. The 4D Global Infrastructure Fund ('the Fund') aims to outperform the OECD G7 Inflation Index + 5.5% p.a. over the medium to long term (before fees).

4D Global Infrastructure Fund

Monthly performance update

As at 31 August 2020

Portfolio performance review

The 4D Global Infrastructure Fund was down a net 2.15% (AUD) in August, under-performing the benchmark's return of 0.44% (by 2.59%) but out-performing the FTSE 50/50 Infrastructure Index, which was down 2.72% (AUD) in August. The A\$ finished at 73.8c, up 3.3% detracting from reported net performance of the Fund.

The strongest performer for August was German airport group Fraport up 16.4% as continental European travel recommences and there is some hope of passenger recovery.

The weakest performer in August was Brazilian toll road operator Ecorodovias down 11% as COVID-19 continues to spike in Brazil putting pressure on the overall market.

We continue to position for the prevailing economic outlook and infrastructure as a means of a recovery as we will look to capitalize on the raft of opportunities currently on offer.

Month in review

The US S&P 500 was up 7.13%, the broader MSCI World Index was up 6.68% while EMs were up 2.21% (all USD).

US August economic activity indicators showed more positive signs. The manufacturing ISM lifted to 54.2, ahead of expectations. The composite non-manufacturing ISM also beat expectations, lifting to 58.1. Non-farm payrolls lifted +1,763k in July, as unemployment fell to 10.2%. Average hourly earnings ticked down to 4.8% (yoy) in July, core CPI lifted 0.6% (mom), while yoy it lifted +1.6%. July retail sales rose again +1.2% (mom) but below expectations. July housing starts surged +22.6%, well ahead of expectations. China's economic data also strengthened. The July trade surplus of \$62.3bn was well ahead of expectations. July CPI rose 2.7% while July manufacturing PMI ticked-down to 51.0, below expectations of a slight increase. European data remained weak but activity indicators are improving ahead of expectations. The flash Eurozone manufacturing PMI for July was ahead, lifting to 51, while the composite PMI also rose to 54.9. June CPI was +1.2% (yoy), in-line with expectations.

Significantly, in the simmering US/China relationship, both countries reaffirmed their commitment to the Phase-1 trade deal that was struck back in January 2020, demonstrating a willingness to co-operate even as tensions rise over other issues. The two countries discussed steps China has taken, including ensuring greater protection for intellectual property rights and removing impediments to certain American companies.

But for each step forward there seems to be 1 back at present with Beijing firing 4 missiles into the South China Sea. Separately, the US announced trade and visa restrictions on 24 companies for their efforts to help China 'reclaim and militarize disputed outposts'. It is likely this political skirmish will continue. However, ultimately we

believe economic necessity will be the key swing factor in resolving disputes between the 2 super powers.

In a significant policy shift Bloomberg reports China's top leaders will soon lay out their economic strategy for the next 5 years that will include a new ambition to ramp-up domestic consumption, and make more critical technology at home.

A Joe Biden US election victory could see a big increase in taxation and federal spending, together with a shakeup of healthcare, regulatory and trade policy. All of that could have a bearing on equities. However, given the pandemic, fiscal and monetary policy are likely to remain loose regardless of who wins the election.

Japanese PM Abe officially announced his resignation. The resignation per se was not a complete surprise. However, the timing was unexpected. The next LDP leader (ie. next PM) should be elected relatively quickly. Regardless of who the next leader is the basic contour of Japanese policies is unlikely to change, especially in the current COVID-19 environment.

In EM land there was a set-back for the proposed huge Mercosur (Argentina, Brazil, Paraguay, and Uruguay)/EU trade deal when, for the first time, German Chancellor Angela Merkel voiced her 'serious doubts' about the deal given the ecological threat looming over the Amazon in Brazil.

Also in EM's, India's economy posted the biggest contraction among major economies in 2Q20, with a recent surge in coronavirus infections weighing on the outlook for recovery. GDP shrank 23.9% in the 3-months to June from a year earlier. While there are early signs that activity began picking-up in 3Q20 as lockdown restrictions were eased, the recovery is uncertain as India is becoming something of a global pandemic 'hot spot'.

How to invest
